ACME BANK, NATIONAL ASSOCIATION

Commercial Lending Division

REQUEST FOR PROPOSAL

AI-Powered Document Intelligence and Automated Proposal Platform

Solicitation No. RFP-2026-DOCAI-04

Issue Date	October 29, 2026
Procurement Contact	Eleanor Vance, VP, Strategic Sourcing & Technology Procurement e.vance@acmebank.com
Intent to Bid Due	November 9, 2026, 5:00 PM ET
Questions Due	November 13, 2026, 5:00 PM ET
Proposals Due	December 11, 2026, 5:00 PM ET
Submission	Box secure upload (PDF format)

Acme Bank, N.A. Confidential. Not for distribution outside the recipient organization.

1.0 INTRODUCTION

1.1 Purpose

Acme Bank, National Association (the "Bank") is requesting proposals from qualified vendors ("Respondents") for an AI-powered document intelligence platform to support its Commercial Lending Division. This RFP sets out the Bank's requirements, the evaluation process, and submission instructions.

1.2 Background

The Bank is headquartered in New York, NY, with approximately $280 billion in total assets and operations in 42 states. The Commercial Lending Division processes over 14,000 commercial loan packages per year across Corporate Banking, Commercial Real Estate, and Middle-Market Lending. All loan files, compliance records, and due diligence packages are stored in Box (Enterprise Plus). Native Box integration is therefore mandatory.

Today, operations staff manually classify inbound loan documents, resulting in an average intake backlog of 48 hours per package. Analysts spend an estimated 30 to 40 percent of research time locating precedent documents and prior RFP responses, and document metadata is re-keyed into Salesforce Sales Cloud by hand, costing approximately 12 staff hours per week.

2.0 SCHEDULE

The Bank may revise the schedule below by written addendum. All times are Eastern.

Event	Date
RFP issued	October 29, 2026
Intent to Bid and signed NDA due	November 9, 2026
Written questions due	November 13, 2026
Answers issued (Addendum 1)	November 20, 2026
Proposals due	December 11, 2026, 5:00 PM
Finalist demonstrations	January 11–22, 2027
Anticipated award	February 2027

3.0 SCOPE OF WORK

The following capabilities must be generally available in production at contract execution. Roadmap items will not be accepted in place of current functionality.

3.1 **Box integration.** Connect to the Bank's Box environment using the Model Context Protocol (MCP). Documents must be accessed in real time; persistent caching or bulk export of Box content to vendor infrastructure is not permitted.

3.2 **Document classification.** Automatically classify loan package documents (financial statements, tax returns, certificates of insurance, executed agreements, appraisals) on upload, with low-confidence results routed for human review.

3.3 **Search.** Answer natural-language questions across the Box repository with citations to the specific file, page, and excerpt.

3.4 **RFP drafting.** Produce cited first drafts of RFP responses from past responses and product documentation stored in Box, reducing drafting time from 14 business days to two or fewer.

3.5 **Salesforce.** Synchronize document metadata, classification results, and workflow events with Salesforce Sales Cloud in both directions.

4.0 TECHNICAL REQUIREMENTS

4.1 Provide an architecture diagram and description of the Box integration, including the MCP connector and authentication flow; how Box permissions and Box Shield labels are enforced at query time; where, if anywhere, document content or embeddings are stored; and p50/p95 query latency on a repository of at least 10,000 documents.

4.2 Support SAML 2.0 and OIDC single sign-on with both Okta and Microsoft Entra ID (the Bank's selection is pending), SCIM provisioning, and role-based access for commercial bankers, underwriters, compliance officers, and administrators.

4.3 Provide a documented REST API secured with OAuth 2.0, supporting metadata reads and writes, webhooks for upload, classification, and version events, and batch sync to Salesforce custom objects.

4.4 Disclose the AI model(s) used, where they are hosted, how model changes are communicated, and how accuracy is measured, consistent with the Bank's model risk management policy (SR 11-7).

5.0 SECURITY AND COMPLIANCE

The requirements below are mandatory. A proposal that fails any one of them will not proceed to scoring.

Requirement	Evidence Required
AES-256 encryption at rest, with customer-managed keys	Security whitepaper
TLS 1.2 or higher in transit	Security whitepaper
SOC 2 Type II report covering all five Trust Services Criteria, issued within the last 12 months	Audit report (under NDA)
ISO/IEC 27001:2022 certification	Current certificate
No use of Bank data, metadata, or queries to train or improve any AI model	MSA language and SOC 2 evidence
All data processed and stored in the United States	Sub-processor list
Alignment with GLBA and the Interagency Guidance on Third-Party Relationships	Completed SIG questionnaire
99.95% monthly uptime with service credits	SLA
Audit logs of access and queries retained for seven years	Logging documentation

6.0 IMPLEMENTATION AND PRICING

The Bank requires deployment to an initial group of 250 users within eight weeks of kickoff. Respondents must provide a milestone plan, a RACI chart, and two references for enterprise deployments completed on a comparable timeline. Change orders for the Box, Salesforce, or SSO integrations will not be accepted.

Pricing must be fixed and itemized, and must separately state: (a) implementation services; (b) annual subscription for 250 users and the price per additional user; (c) 24x7 support and a dedicated Customer Success Manager for Year 1; and (d) three- and five-year pricing options. Pricing must remain valid for 180 days.

7.0 PROPOSAL FORMAT AND EVALUATION

Proposals must be organized into the sections below and will be scored on the weights shown. Finalists will be asked to demonstrate the platform using a sample document set provided by the Bank.

Section	Page Limit	Weight
1. Executive Summary	2	20
2. Technical Approach and Box Integration (Sections 3.0–4.0)	10	25
3. Security and Compliance (Section 5.0)	8	25
4. Financial Services Case Study, with reference contact	3	15
5. Implementation Plan and Pricing (Section 6.0)	6	15

Respondents must also include a signed cover letter and a list of any exceptions to this RFP or to the Bank’s Master Services Agreement. The Bank will award to the proposal it considers most advantageous, which may not be the lowest priced.

8.0 SUBMISSION AND GENERAL TERMS

8.1 Questions must be submitted in writing to Eleanor Vance at e.vance@acmebank.com by November 13, 2026. Answers will be shared with all Respondents. Respondents may not contact other Bank employees about this RFP during the solicitation period.

8.2 Proposals must be uploaded as PDF to the Box submission folder, which will be shared after receipt of the Intent to Bid. Late proposals will not be accepted.

8.3 This RFP is not an offer to contract. The Bank may reject any or all proposals, waive informalities, negotiate with any Respondent, or cancel this RFP at any time. Respondents bear all costs of responding.

8.4 Award is subject to the Bank’s third-party risk review and execution of its Master Services Agreement and Data Protection Addendum.

8.5 The contents of this RFP are confidential and may be used only to prepare a response.
