IBM BOB: DETAILED FEATURE SPECIFICATION & CAPABILITY MATRIX

Comprehensive Breakdown of Document Intelligence, Ingestion & Generation Modules

Module Count	6 Core Enterprise Modules
API Standards	OpenAPI 3.1, Model Context Protocol (MCP) v1.0, GraphQL, gRPC
Supported File Formats	PDF, DOCX, XLSX, PPTX, TXT, CSV, JSON, TIFF, PNG, JPEG

1. Document Ingestion & Parsing Engine

Feature Name	Description	Supported Envs	Latency SLA
Box MCP Streaming Ingestion	Direct stream ingestion of Box files with zero local disk caching.	Cloud / Hybrid / Gov	< 250ms per doc
Complex Table Reconstruction	Reconstructs merged-cell financial tables and multi-column spreadsheets.	All platforms	< 500ms per table
OCR & Scanned Document AI	Extracts text and key-value pairs from scanned PDFs and images.	Cloud / On-Prem	< 1.2s per page
Classification & Tagging	Auto-classifies files by document type (RFP, MSA, SOC2, Financial).	All platforms	< 150ms per doc

2. Agentic Reasoning & Response Generation

Feature Name	Description	Accuracy Benchmark
Automated RFP Drafting	Generates 50+ page RFP response drafts across executive summary, technical, security, and case study sections.	99.4% factual accuracy
Evidence Grounding Engine	Attaches clickable Box deep-links, page numbers, and exact sentence snippets to every answer.	100% verifiable citations
Conflict Detection	Identifies discrepancies across multiple document versions (e.g. outdated vs current SLAs).	Automated warning flags
Gap Analysis & Missing Info	Flags missing requirements or unsupported questions with explicit "Insufficient Evidence" notices.	Zero hallucination guardrail
