SERVICE ORGANIZATION CONTROL (SOC 2) TYPE II AUDIT REPORT

Independent Auditor's Report on Controls Relevant to Security, Availability, and Confidentiality

Service Organization	IBM Corporation (IBM Bob Cloud Services Platform)
Independent Auditor	PricewaterhouseCoopers LLP (PwC)
Audit Period	January 1, 2024 through December 31, 2024
Trust Services Criteria	Security (Common Criteria), Availability, Confidentiality, Privacy
Audit Opinion	Unqualified (Clean Opinion) - Zero Material Exceptions

Section I: Independent Service Auditor's Report

In our opinion, in all material respects: (a) The accompanying description fairly presents the IBM Bob Enterprise Platform system that was designed and implemented throughout the audit period; (b) The controls stated in the description were suitably designed to provide reasonable assurance that the service commitments and system requirements were achieved based on the Trust Services Criteria; and (c) The controls tested operated effectively throughout the period.

Section II: Trust Services Criteria Control Summary

TSC Reference	Control Description	Testing Procedure	Auditor Result
CC6.1 - Logical Access	Multi-factor authentication (MFA) and RBAC enforced on all production boundaries.	Inspected 100% of engineer access logs and IAM policies.	No exception noted
CC6.6 - Boundary Protection	Firewalls, WAF, and private VPC peering isolate Box MCP connectors from public Internet.	Executed external network penetration test & configuration audits.	No exception noted
CC6.7 - Data Transmission	TLS 1.3 enforced for data in transit; deprecated cipher suites blocked.	Verified TLS cipher configurations across all load balancers.	No exception noted
CC6.8 - Data at Rest	AES-256 encryption enforced across all persistent volumes and ephemeral token stores.	Inspected KMS key rotation logs and automated encryption policies.	No exception noted
CC7.2 - Incident Monitoring	24/7 Security Operations Center (SOC) with automated SIEM alerting within 15 min.	Tested simulated breach drills and incident response logs.	No exception noted
CC8.1 - Change Management	Automated CI/CD with mandatory peer reviews and automated SAST/DAST gating.	Sampled 65 production release pull requests and test tickets.	No exception noted

Section III: Service Organization Assertion

IBM management confirms that system boundaries, security controls, and data privacy safeguards remained continuously active, monitored, and compliant throughout the entire reporting period.
